

## Air Conditioner for Control Panel **SNY120-1**

Reliable and rugged air conditioner for your control panel to maintain the ideal temperature in the panel while prolonging the life of electrical components. Eliminating the fan cooling which will protect the internal panel from dust and heat

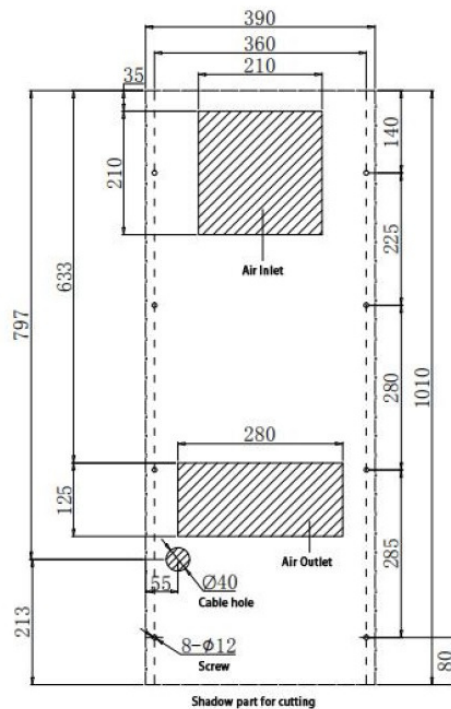

### Features

- Good design and structure
- Easy maintenance
- Digital control and high precision temperature control
- Main components CE and RoHS certified

## Technical Parameters

|                                  |                      |
|----------------------------------|----------------------|
| <b>Model</b>                     | SNY120-1             |
| <b>Cooling capacity(L35/L35)</b> | 2000W                |
| <b>Voltage</b>                   | 220VAC ± 15% 50Hz    |
| <b>Rated Power(L35/L35)</b>      | 910W                 |
| <b>Rated Current</b>             | 4.3A                 |
| <b>Cabinet air volume</b>        | 320m <sup>3</sup> /h |
| <b>Ambient air volume</b>        | 810m <sup>3</sup> /h |
| <b>Circuit max pressure</b>      | 26bar                |
| <b>Refrigerant</b>               | R134a                |
| <b>Working temperature</b>       | -5 ~ 45°C            |
| <b>Noise</b>                     | 70dB                 |
| <b>Weight</b>                    | 48Kg                 |
| <b>Dimension(W×D×H)</b>          | 390x245x1009mm       |
